

### **Austin/Travis County Child S.A.F.E. (Safety and Fire Education) Program:**

The SAFE program is designed to teach children and adolescents fire safety. This is a free one-to-one fire safety class for the child (ages 2-17) and parent with:

- An interview and evaluation of juveniles to identify their needs and determine the risk for future fire setting.
- Age appropriate activities and videos that teach children the basics of fire safety and fire behavior and the consequences of a fire out of control.
- Information to help parents learn what they can do to help reinforce safety rules and teach their child responsible behavior.

The program can also refer families to other professionals for further counseling if needed. Concerned parents, family members, teachers or other members of the community may refer children and youth to our program by calling 512-854-HELP (4357). You are encouraged to call at the first sign of fireplay.
